- Optional service upgrades available, including Educare Bundles, specially priced for educational institutions

ACER® ASPIRE® SWITCH 10 SW5-012 SERIES

Tent

Tablet

Display

Create, collaborate & share on one device

Aspire Switch 10 SW5-012 is more than a notebook, more than a tablet. This four-in-one device offers greater usability for full-on productivity or fun at work, school or home.

- **Notebook:** The spacious keyboard (95% of full size) and multi-gesture touchpad provide comfortable, efficient navigation and typing.
- **Tablet:** At just over one pound and half-an-inch thick in tablet mode, the Switch combines mobility with productivity. It's easy to hold while reading or navigating online. Plus, the battery provides up to 8.0 hours of on-the-go power, enough to last through the school day or a cross-country flight.
- **Display:** Present or share with classmates, clients or colleagues by simply flipping the display around, facing away from the keyboard.
- **Tent:** When your work area is limited, fold the notebook and tablet portions into a tent position for space-saving easy access.

The 10.1" touchscreen has advanced features for superb color reproduction and better readability indoors and out.

- **IPS:** In-plane switching means the display doesn't lighten or produce ripples when you touch it.
- **Corning® Gorilla® Glass 3:** The touchscreen, made from this glass, is extra tough, resistant to scratches and impact.
- **Zero Air Gap:** This technology cuts the distance between the touch and LCD layers, minimizing reflections and improving wide-angle viewing.
- **LumiFlex:** Color contrast and brightness are optimized when outdoors.
- **Ambient light sensor:** The brightness of the 10.1" IPS screen is adjusted based on lighting conditions.

This four-in-one system lives up to its name. Switching between modes is a smooth process, even when you're in a hurry.

- **Acer Snap Hinge:** A magnetic bar acts as a guide, so no matter how poor your aim, tablet and keyboard dock are pulled together.
- **Latchless design:** Rather than a single latch, the Switch 10 has two sturdy metal hooks. You get a firm hold plus a smooth, slimmer chassis.
- **Secure hold, easy release:** It's practically impossible to unintentionally separate the two pieces, but when you are ready to disconnect, simply hold the keyboard dock with one hand, and pull up the tablet with the other.
