

A woman with dark hair is seated at a long, dark wooden conference table in a modern office. She is looking down at a laptop in front of her, with her hand resting on her chin. The table is set with several clear glasses of water and papers. In the foreground, the back of a dark wooden chair with horizontal slats is visible. Large windows in the background provide a view of a cityscape.

# Targus WiFi AutoSwitch Utility

## COST:

FREE with purchase of Targus Universal USB 3.0 docking stations.

Laptops often connect to corporate wireless networks even when simultaneously connected to a wired Ethernet connection. This unfortunately consumes network bandwidth and can be a costly burden for businesses especially when impacting network performance.

## TARGUS SOLUTION:

The Targus WiFi AutoSwitch Utility is an effective software program that eliminates this problem. When it auto-detects a wired Ethernet connection, it turns off the PC laptop’s WiFi card. When undocked, the WiFi card automatically turns back on.

This Targus solution provides seamless connectivity and maximum productivity for end users while optimizing network speed and performance. It’s easy to install—just download and let it do the rest.
