DEFCON®
Security Locks

Targus recently introduced a new lock design for all DEFCON Security Combination Locks. Our new designs and features provide an improved, user-friendly experience when connecting and securing laptops, tablets, docking stations and displays.

DEFCON Serialized Combination Lock
PA410S-1 (Single Pack) | $34.99
PA410S-25 (25 Pack) | $874.99

Did you know?

- **A laptop is stolen every 12 seconds***
- **The cost of just one lost laptop, data and related productivity could total around $244,000**
- **More than 600,000 PCs are stolen a year**
- **97% of stolen laptops are never recovered**

DEFCON Dual Serialized Combination Lock
ASP58USX-25 (25 Pack) | $999.99

New Lock Design and Improvements

T-Bar Locking Mechanism
T-Bar locking option increases sheering and axial strength for better security.

Offset Pins
Locks are able to sit lower on the work surface, accommodating slimmer devices.

Bumper Spacer
Provides a snug, non-scratch fit to any device with a locking slot.

360°/90° Swivel
Improves lock flexibility and freedom for better interaction.

## How to Attach your DEFCON Cable Lock to your Device

1

Enter preset combination and line it up to appear in viewing window

2

Press and hold locking button

3

Insert cable lock into computer's lock slot and release locking button

4

Turn dials to conceal combination

Targus Advantage - Serialized Combination Locks

This no key solution offers global access to combinations via a secure, cloud-based password protected website that eliminates downtime for IT and users as well as provides significant cost savings.

- Passwords can be changed by user for greater flexibility and security.
- Combinations are emailed only to registered email addresses to protect confidential information.
- Passwords expire after 6 months for continued combination protection.
- Accounts can be activated and deactivated by a Targus Sales Rep for additional security.
- Password retrieval is as easy as 1-2-3.
